One Source

Simple, reliable efficient

FLSmidth's Ful-Vane™ rotary vane compressors are designed for long life, low operating costs, and minimal downtime.

With only two bearings and no valves, pistons, crankshafts, or helical screws, field maintenance is easier than with other compressor technologies.

Our B3000™ carbon fiber blades outlast the competition. In addition, the cylinder and rotor can each be re-machined several times - resulting in a number of Ful-Vane compressors still in operation since the 1940s.

- Suitable for casing head, flare, natural, and bio gases
- Durable carbon fiber blades extend the cylinder life
- Total capacity control with VFD and/or gas bypass
- Single-stage to 3000 SCFM, two-stage to 1800 SCFM
- Working pressures to 300 PSIG
- Made in the USA since 1929

Call us at +1 610 264 6800 and mention this ad to receive a special package offer.
